HSC	2020-2021	86.00%	G.S.E.B
Bachelor of Commerce	2021-2024	6.70	VNSGU

## Professional Skills

- **Pograming Skills** : C, C++, JavaScript
- **Frontend Skills** : HTML5, CSS3, Bootstrap, ReactJs, Tailwind css
- **API Intergration** : Axios, RESTapi
- **Languages** : English, Hindi, Gujarati

## Work History

SwickTech Solutions

Jan 2024 - Present

- “During my Tenure at Swicktech, in the first 8 months, I gained in-depth knowledge of frontend libraries and applied this knowledge to work on practice projects as well as client projects. In order to improve my frontend skills, I created a currency converter using HTML, CSS, and JavaScript.In pursuit of advancing my knowledge in ReactJS, I studied the useState and useEffect hooks to develop a,food delivery project for a client"

# Project Worked

- **Food Delivery Website ( Frontend )**

"I designed a food delivery website using **HTML**, **CSS**, and **ReactJS** incorporating **React hooks** and conditional rendering for dynamic user interactions. The site features a responsive and visually appealing layout, ensuring a seamless and engaging user experience."

➡ [click here to open.](#)

- **GoLalita Website ( Frontend )**

"I developed a GoLalita.com-inspired website, focusing on the frontend with **HTML**, **CSS**, and **ReactJS** The project utilized React hooks like **useState** and **useEffect** for state management and side effects, implemented conditional rendering for dynamic interactions and incorporated **React Router** for navigation. Additionally, I performed data fetching to enhance the site's functionality and user experience."

➡ [click here to open.](#)

- **Currency Converter**

"I developed a **Currency Converter** application using **HTML**, **CSS**, and **JavaScript**. The app features intuitive task management, allowing users to add, edit, and delete tasks easily. This project highlights my skills in creating functional, interactive web applications with a clean and straightforward user interface."
